Mr. William L. Borden
Executive Director, Joint Congressional
Committee on Atomic Energy
The Capitol
Washington 25, D. C.

Dear Bill:

I cannot tell you how deeply grieved we all have been here over the passing of Brian McMahon. I don't have to tell you — for you, more than anyone, would know — how much he has contributed to the support of the American intelligence system in its infancy and how many helpful suggestions he was so good as to make. The sense of loss which has been felt by the General and the scientific people here and myself has been very real.

With kindest regards, I am

Yours sincerely,

Walter L. Pforzheimer
Legislative Counsel
